What is Game Developer

A game developer is software developer specialized in the development of games.

- My intended career is to become a video game developer.
- As a video game developer, I want to be able to work with other software developer gigs.
- Game development takes years of individual and teams of professionals.

Skills

I am good in the following which is the required skills to become a good game developer:

- I do have a good team working skills which is an advantage for me to work with other developer in other to make games
- I do have the ability to work independently on my own projects
- I have original and inventive method to resolving difficult technical issues
- I have good way of interacting with others.
- I always meet up with target and customers need

Responsibilities

As someone that develop game's I must need to know the following;

- Designing and development of high-quality coding
- Reviewing of code quality
- Finding problems and bugs

Qualifications

As being a game developer does not require any specific degree, but the following foundation degrees or HND are valid for any game developer:

- Computer games (development or design)
- Computer games programming
- Computer science
- Games technology
- Software engineering.

Career prospects

Working as a self employed or planning my own development studio is possible as soon as I have enough experience
