

Basic Digital Safety

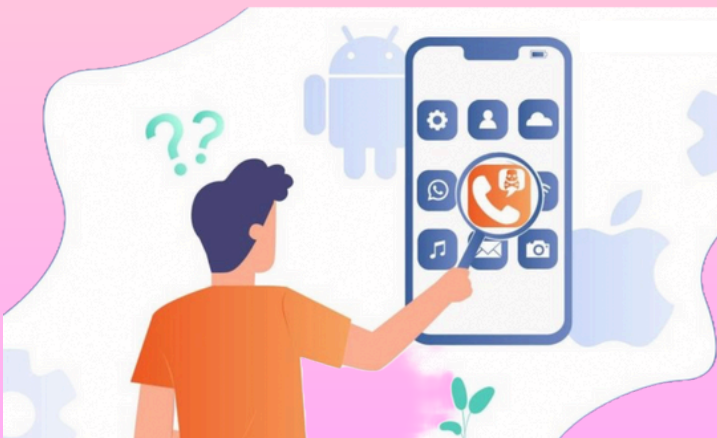

2-step verification

Also known as two-factor authentication (2FA), is one of the most effective ways to protect your online accounts from cyber criminals (National cyber security centre,2021).

Installing apps from official sources

It is always recommended to download apps from official app stores (e.g. Google Play, Apple App Store). Most of the times third-party app stores will contain fake apps with potential malicious codes (Cyber security centre for the isle of man,2024).

Instaling the Latest updates

Updates, on top of the improvements and new features, also includes protection from different kinds of viruses and malware (National cyber security centre, 2021).

Having a strong Password

It's essential to have a strong and separate password for all your accounts, especially in the case of your Email Account (National cyber security centre, 2021)
