Innovation Management in Volvo Group

Would you be interested to know about Volvo Group and how the innovation is being managed in Volvo Group? The topics comprised in this session are, capturing the best ideas, assessing the ideas for novelty, channeling the ideas for implementation, following up the development progress, sharing the outcomes to report status and to inspire others.

Short Biography:

Annamalai Vellaichamy, Indian-born Swedish, working with Volvo Group as a Product Manager for software machinery and as an Innovation representative for my section. As an innovation representative, I'm responsible for filling up my sections backlog with new ideas, and normally I do not generate ideas myself, but rather, stimulate others to generate new ideas. Moreover, assist them with the process to channel their ideas within the organization. I'm basically an electronics and communication engineer, having over 15 years of industrial experience, especially in the field of automotive systems. I'm living with my wife, named Malarvizhi Subramanian and my son, named Nilan.

Annamalai Vellaichamy,
Product Manager
Volvo Group
Gothenburg, Sweden

The International Standards Organisation 56000 Series

“The purpose is to provide guidance on how an organisation could build and what needs to be addressed to build an innovation management system without detailing the specific system itself.....

....The standards are intended to be applicable to all kinds of organisations (private, public and NGOs) of any size, with a special focus on SMEs, and for all kinds of innovation (products, methods, services, processes, organisational, and business models new or improved).”

56000 Series

ISO/DIS 56000 Innovation management – Fundamentals and vocabulary

ISO 56002:2019 Innovation management – Innovation management system - Guidance

ISO 56003:2019 Innovation management – Tools & methods for innovation partnership

ISO/TR 56004:2019 Innovation management assessment - Guidance

ISO/CD 56005 Innovation management – Intellectual property management

ISO/AWI 566006 Innovation management – Strategic intelligence management – Guidance

ISO/AWI 56007 Innovation management – Idea management

Good luck America

COVER STORY

Today, Donald Trump becomes the 45th president of the United States of America

WASHINGTON — Take a deep breath, this is really happening. This morning in Washington DC, the United States of America, what was once laughed off and thought of as unthinkable by the overwhelming majority of politicians, pundits, journalists and citizens, has become reality: Donald Trump will be sworn in as the 45th president of the United States of America.

Trump arrived in Washington with his Cabinet nominees. "We have by far the highest IQ of any cabinet ever assembled," Trump said in a characteristically grandiose declaration before several hundred supporters, lawmakers and allies at an official luncheon.

Later, the president attended a "Welcome Concert" at the Lincoln Memorial, where thousands of supporters were waiting. His aides, however, were gearing up for a raft of executive orders, with Trump ready to roll back many of outgoing US President Barack Obama's policies.

Economic Prospects and Policy Challenges for the GCC Countries

Publication Date: December 10, 2020

Electronic Access: [Free Download](#). Use the free [Adobe Acrobat Reader](#) to view this PDF file

Summary: The COVID-19 pandemic is having far-reaching consequences for the global economy. Measures to contain the spread of the virus have led to sharp declines in economic activity across the globe, particularly in 2020Q2. The hardest hit sectors have been those requiring intensive human contact, such as tourism, transportation, services, and construction, while, in general, IT-intensive activities have fared better. The economic contraction is most significant in advanced economies. The GCC countries face a double impact from the coronavirus and lower oil prices. GCC authorities have implemented a range of appropriate measures to mitigate the economic damage, including fiscal packages, relaxation of monetary and macroprudential rules, and the injection of liquidity into the banking system, and there are recent signs of improvement. Low oil prices have caused a sharp deterioration of external and fiscal balances, and fiscal strains are evident in countries with higher debt levels.

Assessment A

A large, glossy green sphere with a white highlight, centered on the slide.

A Sustainable Innovation & Circular Economy Strategy

Scenario

CMSW (Cymru Manufacturing Solutions Wales) is a business which has a large domestic client base spanning many industry sectors such as automotive, aerospace and medical device development. Their manufacture capabilities allows them to manufacture using a wide range of material types; polymers, metals fabrics and composites into a variety of products and subcomponent parts. Their expertise and knowledge in the design and manufacture of innovative products is well recognised by both its customers and competitors, the company has cultured, developed and maintained a strong brand.

Presently at a strategic level, CMSW is considering how to ensure and secure the company's future, whilst at the same time maintaining its commitment to environmental consideration with its intentions of moving away from a linear to a more circular economy based operation.

As the company's lead Product Development Manager (and a 'champion' of innovation across all the company's activities) you've been assigned by the board of directors to undertake a brief global reflective review of innovative undertakings and activities carried out by companies, organisations, government support agencies, academic institutions and community based initiatives.

Task Outline

Making discerning and selective use of international literature and other media channels e.g. academic journals, television and newspaper accounts, global business, and sector specific trade magazines articles etc. You are tasked to investigate and prepare a presentation on the following, with a specific focus on the significance of how the innovation is managed, from concept to delivery.

Consideration should be made to how the cultural and political attitudes differ from country to country, or possibly global regions, identifying how these factors both hinder and benefit new environmentally innovative efforts. Identify common factors that new businesses face in today's world, and how they can seek to overcome these difficulties. Investigate the issues that some businesses have previously faced to establish themselves internationally, consider why their levels of success varied from country to country or region to region.

Deliverables

- Produce a presentation using MS PowerPoint (or equivalent) to capture the above
- The presentation shall last approximately 30 minutes
- The presentation shall conclude with a questions and answer session
