

Basic digital safety

Module name: Digital skills

Module code: LCLM 4002

Name: Estera Radu

Id:2414757

Group 6:

We post on social media, we sign up for online services, and we buy from online stores, and as we do those, we use our names, emails, and payment information.

When you and your family use the internet, you are exposing yourself to a wide range of potential online threats. There are some of the biggest internet dangers you and your family need to watch out for. Examples : Fake websites, online scams, Malware and viruses and lots more

Internet safety involves a combination of factors which includes security software, being aware of online threats and practising good digital hygiene like creating strong and unique passwords.

What are the risks ?

- Virus
- Hackers
- Scam
- Spyware
- Fake website

The reason for why hacking is happening is to manipulate banking system with the specific purpose of stealing credit card number.
