3. Indicate the reading direction of the stela below with arrows and/or numbers (**second one**). Do we read in lines or columns?
4. **Encircle the name** of both person.
5. In comparison with the stela of Mereri we talked through in class, characterise what we expect to see in every part of the stela of Hetepsj (what does the inscription consist of? - that could be words like names, titles, formula,... – this list does not give all possibilities). Encircle the particular parts and name them.

You do not need to transliterate or translate the stela, simply give the specific components.

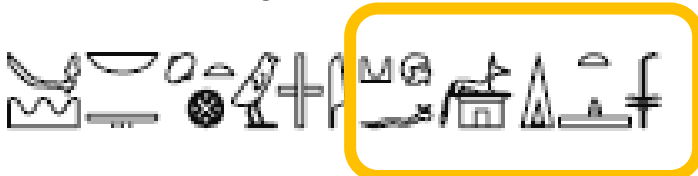

Tip: one component we had in both stela of Mereri is missing, another is very long compared to Mereri.
