MODULE : ACADEMIC AND EMPLOYABILITY SKILLS

MODULE CODE : LCHS4001

LECTURER : ANITA NAN

Report written

Table of Contents:

- Introduction
- Time management Skills
- Problem-solving abilities
- Prophecy with Technology tolls
- Insight with Costumer needs
- Team work skills
- Strengths
- Weakness
- Opportunity and Treats
- Conclusion
- Reference

Job readiness: There are a few key Job Readiness skills that you should develop if you want to find a hospital job. These include strong writing and communication skills, problem-solving abilities, good organizational skills, and experience working in a team environment. It is also important to be well-versed in medical terminology and have knowledge of core medical procedures.

Time management skills:

If you're looking to manage your time more effectively, there are a few strategies that you can employ. One common way is to break down tasks into smaller, more manageable chunks and then focus on completing one task at a time. This helps minimize distractions and ensure that your priorities are addressed. Another effective strategy is setting deadlines for yourself and sticking to them no matter what. As long as the goals you set aren't too difficult or unrealistic, this method can help motivate you while ensuring progress towards the ultimate goal. And finally, try using timers or alarms to keep tabs on how much time has been spent on specific tasks over an entire day or week. By taking these simple steps, you will be able to better allocate your valuable resources and achieve tangible results!

Problem-solving abilities:

being able to handle stressful situations effectively is critical for anyone who wants to work in a hospital setting. Learning how to deal calmly with difficult customers or colleagues can make all the difference when it comes to landing your next job.

Excellent communication and interpersonal skills:

interactions with other people, Strong written and verbal communication is also necessary, especially when dealing with patients or writing reports.

proficiency with technology tools:

Strong proficiency with technology tools can be a valuable asset when it comes to finding and filling jobs in the current job market. With so many new technologies being released every day, having a strong grasp of how to use these tools is critical for anyone looking for work. If you are not familiar with some of the newer technologies, such as Google search or social media platforms, then you may want to invest money in training that will help you learn these skills quickly. Additionally, staying up-to-date on industry trends can also be beneficial; by understanding which technologies are becoming more popular among employers, you can ensure that your resume contains information that demonstrates your qualifications in this area.

Insight into customer needs:

Understanding customer needs is critical to developing successful product marketing. You need to know what your target market wants and how you can meet their needs. This requires research, both in-house and external, as well as a good understanding of the buying cycle. Once you have this information, you can create content that meets customers' needs at an emotional level and encourages them to take action.

Teamwork skills:

Teamwork skills are essential for any career. By working closely with others, you can streamline the process and produce high-quality pieces faster than if you were to try and do it all on your own. When collaborating on projects, be sure to communicate clearly about what is needed from one another so that everyone understands the goals of the project. Another important skill for teamwork is being able to give constructive feedback.

Slide 04:

the position usually requires good problem-solving skills in order to deal with challenging situations on a daily basis.

You will also need to be able to work long hours for extended periods of time without feeling exhausted or stressed.

You should also be able to handle stress well and exhibit good patience when dealing with difficult patients or co-workers.

Slide 05:

Strengths:

1. Strong focus on patient safety and quality of care - The hospital has a strong focus on ensuring that patients receive the best possible care, which is reflected in their score for patient safety. They also have a very high rating for the quality of care.
2. Pioneering work in new healthcare technologies - The hospital is at the forefront of some new healthcare technologies, such as artificial intelligence (AI). This makes it an exciting place to work for people who are interested in cutting-edge medical innovations or technology development."
3. Possesses good knowledge of the healthcare industry and its specific procedures.

Weaknesses

1. Lack of experience with modern medicine – Although they have been pioneers when it comes to using certain newer healthcare technologies, this may limit their ability to address issues unique to today's world of modern medicine.
2. May not be familiar with new technologies and their applications within the healthcare industry, which could lead to inefficient workflows or decreased accuracy when completing tasks. -Not well equipped to handle sensitive information as it relates to patient care, resulting in possible exposure of confidential information should this situation arise.

Opportunities and threats:

There are many opportunities and threats in a hospital job. Opportunities can include the potential to work with some of the most important people in the world, learn new skills, and make a difference in patients' lives. Threats can include physical dangers from accidents or injuries, possible exposure to harmful diseases, stress at work, and communication challenges.

Slide 06:

Using time management tools can be extremely helpful in a hospital job. By keeping track of your hours worked and breaks taken, you can easily see where your time is going and make adjustments accordingly. This allows you to stay on task and maximize your productivity.

focuses on creating systems that allow you to efficiently manage your tasks by grouping them into specific folders or "catalogs." This makes it easier to find what you need when you need it, reduces clutter, and helps keep track of deadlines.
