What to Research?

In order to begin to think about possible viable research projects, start with filling in the sections on proposed ideas for your research. The subject area is the first part to start with as this will define the initial parameters of the research. Then turn your attention to researching and completing the rest of the table. The more detail you can fill in at this stage the easier it will be to make decisions on its viability. Please complete three different initial proposals for submission and discussion on Tuesday morning.

Proposal A

What?	Subject / Topic	
Who?	Key Practitioner(s) / Company	
	Key Thinker(s)	
Where?	Location(s)	
When?	Dates / Period	
How?	Critical Lens	
	Research Method	
Question
