The screenshot shows a Moodle LMS interface. The main content area displays a video player. On the left, there is a blue sidebar with navigation icons. The video player shows a black and white photograph of Percy Spencer, a man with glasses, standing in front of industrial machinery. Below the image, there is a text box with the following content:

The human ability to detect patterns in seemingly unrelated events is one of the major things that differentiates our abilities from that of machines.

Take the **microwave oven** for example, which was invented when **Percy Spencer**, a radar technician, found his chocolate bar melted when in close proximity to one of his radar machines.

At the bottom of the video player, there are navigation controls including a play button, a progress bar, and a volume icon. The progress bar shows 7 / 57.

The screenshot shows a Moodle LMS interface. The main content area displays a video player. On the left, there is a blue sidebar with navigation icons. The video player shows a color photograph of Steven Pinker, a man with curly hair, speaking. To the left of the image, there is a text box with the following content:

Is innovation changing things for the better?

As you have seen so far, modern advances are – in general – changing the world for the better.

Psychologist **Steven Pinker** agrees with this, and in his book **Enlightenment Now** (2019), he describes how the welfare of humankind has never been better. In his 2018 TED Talk, he states:

"We will never have a perfect world. But there's no limit to the betterments we can attain if we continue to apply knowledge to enhance human flourishing."

His argument encourages the belief that we can continue to improve the welfare of humankind by making **collective wellbeing** our goal, and by using science and reason to achieve it.

At the bottom of the video player, there are navigation controls including a play button, a progress bar, and a volume icon. The progress bar shows 19 / 57.

Do you still agree that this invention has had the **biggest impact** on the development of society?

the invention of the alphabet and numbering system, as communication between people would not of been possible and numbering would not of made certain laws available which in turn then got used to innovate technology and the industrial revolution

What **beneficial** effects has it had on humankind?
Justify your response in a **forum post**.
