PROFILE

I am a highly self motivated and enthusiastic individual who is eager to find my feet in a job which I enjoy and want to be able to progress further and further throughout my career. I am a quick learner who thrives off the challenge of learning new skills and being in new environments. I have spent most of my working life working as a part of a team which has helped me to grow as a person and bolster my skill set

WORK EXPERIENCE

Gower Green Gardens (Labourer)
November 2019 - September 2020
During my time labouring for a local gardener / landscaper I spent my time working as a part of a big team in a renovation project, the job we were given was to transform an old residential nursing home into a property which was going to be listed on the market within an allocated time frame.
I was working alongside Gower Green Gardens but was also assisting other tradesmen like bricklayers, carpenters and electricians to carry out their tasks too when we had completed our part of the project. I really enjoyed this as I was thrown in at the deep end with no previous experience working with tradesmen so during this job I had learnt a lot more than I initially thought I would whilst effectively follow instructions and maintaining to Health and Safety standards.

Front of House Team Leader - The Woodman, Blackpill
March 2020 - Present
In this job I am required to work all across the front of house sector, primarily being the barman, it can be difficult on times due to the high volume of custom, especially during the school holidays as we are located right opposite Blackpill lido. Working in a busy environment is something which I tend to thrive off, I always try my best to make sure all my colleagues are working to the high standards which are expected from us whilst remaining approachable. I am responsible for training up any new members of staff who will be given the role of bar work and that is something I really enjoy doing, I am comfortable with effectively passing on my knowledge and skills to new team members which has helped me to become more comfortable within a leadership role.

Sports Coaching
Throughout my time in college and university I have had a lot of hours leading sessions with primary school children, in various different sports and other activities. I have planned and delivered sessions on my own which I was very comfortable doing and also have been part of a team to plan and deliver too. I have covered a range of sports from football and rugby to badminton and hockey. I have thoroughly enjoyed the opportunity to do this as it is something I see myself doing long term after I have finished my studies
