

CONSERVE

I conserved the area by planting some flowers in the garden. I did this because I did not have any plants or flowers except the wild one I found whilst exploring the environment. I hope by doing this, it will attract more insects.

I made a bird house from lollipop sticks because I found that there was not as many birds around my garden. I hope that by making this house will bring more wild life into the garden. To make this I started by making the base, I put 4 sticks on another and then stacked them up. Next I made the roof, I put 12 sticks together in a line then 3 across that to secure them together. I also did this to make the bottom of the base. I put 4 sticks on the side to attach the roof to the base.

STORY

Exploring with Lowri & Mali

Lowri and Mali were two sisters that shared a love for exploring the outdoors. ~~one~~ They had noticed some changes in the environment recently and were quite concerned.

Lowri thought to herself, "We need to figure out what is happening and how can we help change it." She shared her thoughts with her sister and they set off on an adventure to discover what's causing the changes.

The girls traveled to many places, learning about the environment and the creatures that live in it. They spoke to many local people but none of them could help to explain why these things were happening.

Lowri and Mali were determined to figure out the cause and to help find a solution, they kept on searching.

The more they explored, they soon realised the truth, because of human activities, people need to be more responsible and take care of the planet better. They thought it was their mission to help spread the word and get others on board to change how we affect the world.

STORY

Continued...

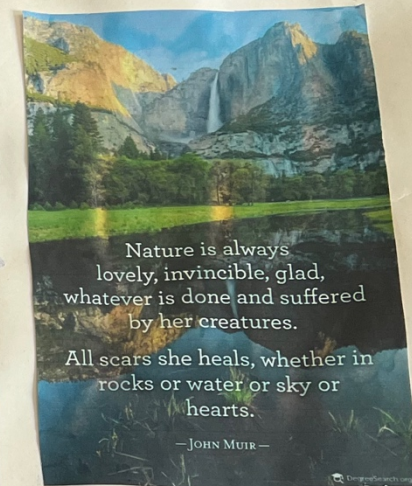

Lauri and Mali knew that they would need help from someone that could help get as many people as possible involved. So they asked their mum and dad to help spread it far and wide, they made plans with leaders and some government officials to ~~propose~~ a solution. It was a battle however with the power of knowledge they had along with the support from family and friends, they were confident it could be done.

The girls explained and explained the effects of climate change and pushed for a positive change within the climate, they slowly started to see a change in what they are doing. Lauri and Mali had inspired so many people and their message they were so passionate about was heard by people all over the world. It is shown that even with limited resources, anyone can make a difference in the world.

REFLECT

On reflection, this experience has given me the opportunity to enjoy nature to the fullest. I really do now appreciate the small things and have loved exploring and helping to conserve all things nature.
