

LEVEL 6 ASSESSMENT SPECIFICATION

Student name:		Student ID number:	
Programme:	BSc (Hons) Health and Care of Children and Young People		
Module:	Perspectives on Child Pedagogy and Development		
Module code:	BMHP6017	Contribution to Overall Module Assessment (%):	50%
Lecturer:	Karen Hudson	Internal Verifier:	Karen Burton
Assignment Title:	Essay	Word count (or equivalent):	3000
Submission deadline:	17 th January 2020	Return date of provisional marks & written feedback:	14 th February 2020
Submission method:	All written assessments, where practical and possible, must be submitted via Turnitin unless otherwise instructed by the Lecturer. (Please DO NOT put this assessment specification into Turnitin or it will match many similarities with other students' submissions.) Alternative submission method (if applicable): Late submission of the assessment will result in a late penalty mark. Penalties for late submission: Up to one week late, maximum mark of 40%. Over one week late, 0%. Only the Extenuating Circumstances Panel may approve a change to submission dates.		
Academic honesty / referencing:	Academic honesty is required. In the main body of your submission you must give credit to authors on whose research and ideas your work is based. Append to your submission a reference list that indicates the books, articles, etc. that you have used, cited or quoted in order to complete this assessment.		

Module Learning Outcomes (from module syllabus)
2. Examine and propose strategies for the role of health, care and family services in promoting health, well-being and development of the child.

TASK DESCRIPTION

The student is required to produce an essay which relates to the particular aspect of the growth and pedagogical development of children and young people, previously discussed in the poster presentation from assignment 1 (3000 words). The essay needs to examine and propose strategies for the role of health, care and family services in promoting health, well-being and development of the child. The essay should be submitted via Turnitin by 23.55 on 17th January 2020.

Write an essay relating to the aspect of the growth and pedagogical development of children and young people chosen for the poster presentation in assignment 1.
--

Define key terms throughout the essay, as appropriate.
--

Outline and analyse a range of current initiatives, strategies, research, supporting organisations that influence practice/service delivery and critically evaluate their effectiveness in supporting the growth, pedagogical development of children/young people in the chosen area.
--

Propose and discuss the strengths and limitations of a range of strategies to assess current situations for the roles of health, care and family services in promoting the growth and pedagogical development of children and/or young people in relation to the topic of discussion. Make appropriate recommendations for future developments/progress, perhaps to formulate plans or solutions to solve problems, or to create artefacts, some of which may be innovative and creative. Consider and discuss the potential benefit or impact of your recommendations on the growth and pedagogical development of children and young people.
--

Present as a full and detailed response which is clear, coherent and well structured. Use appropriate syntax and sense of style. Use appropriate colour scheme and font size. Demonstrate evidence of through understanding of key concepts related to the topic,

Demonstrate reading of a variety of academic and media sources. Correct and appropriate referencing of the information used is required. A reference list is also required at the end of the essay.

GUIDANCE FOR STUDENTS IN THE COMPLETION OF TASKS

NOTE: The guidance offered below is linked to the five generic assessment criteria overleaf.

1. Engagement with Literature Skills

Your work must be informed and supported by scholarly material that is *relevant* to and *focused* on the task(s) set; you should make use of scholarly reviews and primary sources, where appropriate (for example, refereed research articles and/or original materials appropriate to the discipline). You should provide evidence that you have accessed a wide *range* of sources, which may be academic, governmental and industrial; these sources may include academic journal articles, textbooks, current news articles, organisational documents, and websites. You should consider the *credibility* of your sources; academic journals are normally highly credible sources while websites require careful consideration/selection and should be used sparingly. Any sources you use should be current and up-to-date, mostly published within the last five years or so, though seminal/important works in the field may be older. You must provide *evidence* of your research/own reading throughout your work, using a suitable referencing system, including in-text citations in the main body of your work and a reference list at the end of your work.

Guidance specific to this assessment: *You should show a wide level of reading, a minimum of 25 to 30 references, from a variety of sources including reports, textbooks, academic journals and academic based websites. The credibility and relevance of all sources should be considered and untrustworthy sources should be avoided. Electronic referencing should be kept to a minimum and should not include tabloid newspapers, or non-academic sources. Ensure you use both author prominent and text prominent referencing within your work. Avoid referencing discrepancies by checking that the sources used in the text are cited in reference list and vice versa. Information in the essay must be referenced and a reference list must be provided. Make use of the University's guidance for Harvard referencing to help you ensure the correct formats.*

2. Knowledge and Understanding Skills

At level 6, you should be able to demonstrate coherent and detailed knowledge and a systematic understanding of the subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. You should be aware of the uncertainty, ambiguity and limits of knowledge. Your work must demonstrate the growing extent of your knowledge and systematic understanding of concepts and underlying principles associated with the subject area. *Knowledge* relates to the facts, information and skills you have acquired through your learning. You demonstrate your *understanding* by interpreting the meaning of the facts and information (knowledge). This means that you need to select and include in your work the concepts, techniques, models, theories, etc. appropriate to the task(s) set. You should be able to explain the theories, concepts, etc. meaningfully to show your understanding. Your mark/grade will also depend upon the *extent* to which you demonstrate your knowledge and understanding; ideally each should be complete and detailed, with comprehensive coverage.

Guidance specific to this assessment: *Demonstrate coherent and detailed knowledge and understanding of the chosen subject. Gather and present appropriate information to support the chosen factor, which influences the growth and pedagogical development of children and young people previously discussed in the poster presentation. Demonstrate coherent and detailed knowledge and understanding of a range of current initiatives, strategies, research, supporting organisations that influence practice/service delivery for children and young people, in relation to the chosen topic. Define and explain key terms as appropriate.*

3. Cognitive and Intellectual Skills

You should be able to: critically evaluate evidence, arguments, assumptions, abstract concepts and data some of which are at the forefront of a discipline (and that may be incomplete) to devise and sustain arguments, to make judgements and/or solve problems; describe and comment upon particular aspects of current research, or equivalent advanced scholarship, in the discipline. Your work must contain evidence of logical, analytical thinking, evaluation and synthesis. For example, to examine and break information down into parts, make inferences, compile, compare and contrast information. This means not just describing what! But also justifying: Why? How? When? Who? Where? At what cost? At all times, you must provide justification for your arguments and judgements. Evidence that you have reflected upon the ideas of others

within the subject area is crucial to you providing a reasoned and informed debate within your work. Furthermore, you should provide evidence that you are able to make sound judgements and convincing arguments using data and concepts. Sound, valid conclusions are necessary and must be derived from the content of your work. Where relevant, alternative solutions and recommendations may be proposed.

Guidance specific to this assessment: *Undertake an analysis of the chosen topic and provide a critical evaluation and interpretation of the potential impact it has on children and young people's growth and pedagogical development. Critically evaluate the effectiveness of current initiatives, strategies, research, supporting organisations that influence practice/service delivery and supporting the growth and pedagogical development of children/young people. You must qualify all statements with relevant evidence that you have found and be able to justify any statements that you make, supported by relevant references. Based on these, make sound judgements and convincing arguments in relation to the chosen topic.*

4. Practical Skills

At level 6, you should be able to apply the methods and techniques that you have learned to review, consolidate, extend and apply your knowledge and understanding, and to initiate and carry out projects. You will deploy accurately established techniques of analysis and enquiry relevant to the discipline, and apply them in complex and unpredictable contexts, to devise and sustain arguments and/or to solve problems. You should be able to frame appropriate questions to achieve a solution - or identify a range of solutions. You should be able to demonstrate how the subject-related concepts and ideas relate to real world situations and/or a particular context. How do they work in practice? You will deploy models, methods, techniques, and/or theories, in that context or circumstances, to assess current situations, perhaps to formulate plans or solutions to solve problems, or to create artefacts, some of which may be innovative and creative. This is likely to involve, for instance, the use of real world artefacts, examples and cases, the application of a model within an organisation and/or benchmarking one theory or organisation against others based on stated criteria. You should show awareness of the limitations of concepts and theories when applied in particular contexts.

Guidance specific to this assessment: *Based on the chosen aspect of development discussed in your poster presentation make reference to the key issues of concern. Propose and discuss the strengths and limitations of a range of strategies for the roles of health, care and family services in promoting the health, well-being of children and/or young people in relation to the topic of discussion to assess current situations. Suggest appropriate recommendations for future developments/progress and perhaps formulate plans or solutions to solve problems, or to create artefacts, some of which may be innovative and creative. Consider and discuss the potential benefit or impact of your recommendations on children and young people. Your own individual and independent thought should be included within the essay and should be supported by relevant literature.*

5. Transferable Skills for Life and Professional Practice

Your work must provide evidence of the qualities and transferable skills necessary for graduate-level employment requiring the exercise of initiative and personal responsibility and decision-making in complex and unpredictable circumstances. This includes demonstrating: the learning ability for professional development to advance existing skills and acquire new competences of a professional nature that will enable you to assume significant responsibility within organisations; that you can initiate and complete tasks and procedures, whether individually and/or collaboratively; that you can use appropriate media to effectively communicate information, arguments and analysis in a variety of forms to specialist and non-specialist audiences; fluency of expression; clarity and effectiveness in presentation and organisation. Work should be coherent and well-structured in presentation and organisation.

Guidance specific to this assessment: *Your work should be written as an essay. Work needs to be well structured and presented in a coherent manner, which demonstrates clarity of thought. Sentences need to be constructed appropriately and joined into paragraphs. Avoid the use of long sentences and ensure you use academic language throughout. Paragraphs need to be linked together in enable the assignment to flow. Proof read your work to avoid spelling and grammatical errors. The essay should be written in an academic style, and be focused, concise and subject specific. The structure should include an introduction and a conclusion. Students are recommended to use an appropriate font such as Times New Roman 12, Calibri 12 or Arial 12 point.*

STUDENT FEEDBACK FORM

This section details the *extent* to which the assessment criteria are demonstrated by you, which in turn determines your mark. The marks available for each category of skill are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Generic Assessment Criteria	Marks available	Marks awarded
1. Engagement with Literature Skills		
	20	
2. Knowledge and Understanding Skills

	Over 1 week late (0%)		

GENERIC ASSESSMENT CRITERIA

Level 6

In accordance with the Framework for Higher Education Qualifications, at the end of Level 6 students should have coherent and detailed knowledge and a systematic understanding of their subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline. They will be able to accurately deploy established techniques of analysis and enquiry within a discipline, using their conceptual understanding to devise and sustain arguments and/or to solve problems. They should be aware of the uncertainty, ambiguity and limits of knowledge. They should be able to critically evaluate evidence, arguments, assumptions, abstract concepts and data (that may be incomplete), to make judgements, and to frame appropriate questions to achieve a solution - or identify a range of solutions. They will apply the methods and techniques that they have learned to review, consolidate, extend and apply their knowledge and understanding, and to initiate and carry out projects. They will have the ability to manage their own learning, and to make use of scholarly reviews and primary sources (for example, refereed research articles and/or original materials appropriate to the discipline). They will demonstrate the qualities and transferable skills necessary for employment requiring: the exercise of initiative and personal responsibility; decision-making in complex and unpredictable contexts; the learning ability needed to undertake appropriate further training of a professional or equivalent nature.

Level 6	FAIL	MARGINAL FAIL	SATISFACTORY (3 rd / Pass)	GOOD (2.2 / Pass)	VERY GOOD (2.1 / Merit)	EXCELLENT (1 st / Distinction)	EXCEPTIONAL (1 st / Distinction)
Category	0-29%	30-39%	40-49%	50-59%	60-69%	70-84%	85-100%
Engagement with literature (including reading, referencing, academic conventions and academic honesty)	Little or no evidence of reading and/or reliance on inappropriate sources. Views and findings mostly unsupported and non-authoritative. Referencing conventions used incoherently or largely absent.	Poor engagement with essential reading. No evidence of wider reading. Reliance on inappropriate sources, and/or indiscriminate use of sources. Heavily reliant on information gained through class contact. Inconsistent and weak use of referencing.	Engagement with a limited range of mostly relevant and credible sources. Some omissions and minor errors. Referencing conventions evident though not always applied accurately or consistently.	Engagement with an appropriate range of research-informed literature, including sources retrieved independently. Some over-reliance on texts. Referencing may show minor inaccuracies or inconsistencies.	Engagement with a wide range of research-informed literature, including sources retrieved independently. Selection of relevant and credible sources. Very good use of referencing, with no/very few inaccuracies or inconsistencies.	Engagement with an extensive range of relevant and credible literature, informed by the latest research. Consistently accurate application of referencing.	Exceptional engagement with an extensive range of relevant and credible literature, informed by the latest research. High-level referencing skills consistently and professionally applied.
Knowledge and understanding (Coherent and detailed knowledge and	Major gaps in knowledge and systematic understanding of the subject matter.	Gaps in knowledge, with only superficial systematic understanding. Some significant	Limited knowledge and systematic understanding of the relevant concepts and	Knowledge is reasonably detailed, accurate with a good systematic understanding of	Knowledge is reasonably extensive coherent and detailed. Exhibits very	Excellent coherent and detailed knowledge and systematic understanding of	Exceptionally coherent and detailed knowledge and systematic understanding of

Category	0-29%	30-39%	40-49%	50-59%	60-69%	70-84%	85-100%
systematic understanding of the subject area, at least some of which is informed by the latest research and/or advanced scholarship within the discipline.)	Substantial inaccuracies. No awareness of knowledge of the latest research and/or advanced scholarship within the discipline.	inaccuracies and/or irrelevant material. No awareness of knowledge of the latest research and/or advanced scholarship within the discipline.	principles within the subject area which to some limited extent, is informed by current research and scholarship.	the field of study and to some extent, current research and scholarship.	good understanding of the breadth and depth of established views, and the work is, at least in part, well-informed by current research and scholarship.	the principles and theories of current research and scholarship. Clear awareness of challenges to established views and the limitations of the knowledge base.	the principles and theories of the subject, well-informed by current research and scholarship. A critical, sophisticated and nuanced awareness of the ambiguities and limitations of knowledge.
Cognitive and intellectual skills (Conceptual and critical thinking, analysis, synthesis and evaluation of research, assumptions, abstract concepts and data (that may be incomplete); logic, argument and judgement.)	Wholly or almost wholly descriptive work. Little or no analysis, synthesis or evaluation. Failure to develop arguments, leading to illogical or invalid judgements. Unsubstantiated generalisations, made without use of any credible evidence.	Largely descriptive work, with superficial use of critical evaluation. Weak development of arguments and judgements. Information accepted uncritically, uses generalised statements made with scant evidence and unsubstantiated opinions. Ideas sometimes illogical and contradictory.	Limited attempt at critical thinking, analysis, synthesis and evaluation, tending towards description. Some evidence to support emerging arguments and judgements but these may be underdeveloped or with a little inconsistency / mis-interpretation. Asserts rather than argues a case.	Some critical thinking, analysis, synthesis and evaluation. Can analyse new and/or abstract concepts and data without guidance. An emerging awareness of different stances and ability to use evidence (that may be incomplete) to support the argument. Mostly valid arguments and logical judgements. Some tendency to assert/state opinion rather than argue on the basis of	Sound critical thinking, analysis, synthesis and evaluation demonstrating critical thinking. Ability to devise and sustain persuasive arguments, and to review the reliability, validity and significance of evidence (that may be incomplete) to make mostly appropriate and valid judgements.	Excellent critical thinking, analysis, synthesis and evaluation. Ability to investigate contradictory or incomplete information and make strong, persuasive, arguments and sophisticated judgements. Some evidence of independent thought and ability to 'see beyond the question', suggesting a grasp of the broader field and wider concepts.	Exceptional critical thinking, analysis, synthesis and evaluation based on judiciously selected evidence. Ability to investigate contradictory or incomplete information and make strong, persuasive, arguments and sophisticated, nuanced, judgements. Evidence of independent thought and ability to 'see beyond the question', suggesting an outstanding grasp of the

				reason and evidence.			broader field and wider concepts.
Practical skills (Apply/deploy accurately established tools and techniques; initiate and carry out projects; formulate solutions to solve problems in complex and unpredictable contexts.)	Limited or no use of methods, materials, tools and/or techniques. Little or no appreciation of the context of the application. Limited understanding of the application of theory to practice or making appropriate links between the two. Very weak problem-solving skills in complex and unpredictable contexts.	Rudimentary application of methods, materials, tools and/or techniques but without consideration and competence. Flawed appreciation of the context of the application. Weak understanding of the application of theory to practice, with only occasional evidence of making appropriate links between the two. Weak problem-solving skills in complex and unpredictable contexts.	An adequate awareness and mostly appropriate application of well-established methods, materials, tools and/or techniques. Basic appreciation of the context of the application. Theoretical knowledge and understanding applied in practice, but not always making logical links between the two. Can identify problems and propose basic solutions in complex and unpredictable contexts without fully appreciating the complexity.	A good and appropriate application of standard methods, materials, tools and/or techniques. Clear appreciation of the context of the application. Mainly consistent, accurate and logical application of theory to practice, making appropriate links between the two. Can identify problems and propose mostly appropriate solutions in complex and unpredictable contexts.	A very good application of a range of methods, materials, tools and/or techniques. Very good consideration of the context of the application, with perceptive insights. Can identify problems and propose appropriate solutions in complex and unpredictable contexts. Evidence of some innovation and creativity.	An advanced application of a range of methods, materials, tools and/or techniques. The context of the application is well considered, and insightful. Application and deployment extend beyond established conventions. Can identify complex problems and propose excellent solutions. Innovation and creativity evident.	Exceptional levels of application and deployment skills in unpredictable, practical contexts, drawing skilfully on the latest research within the discipline. Can identify complex problems and propose sophisticated solutions. Assimilation and development of cutting edge processes and techniques.
