

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
1. Engagement with Literature Skills		
There is extensive evidence of research and a clear understanding of the dangers of an unprotected wireless network and also the dangers that persist from human actions. You have provided detailed referencing to the sources that you used and the dates that you accessed the sources.	15	13
2. Knowledge and Understanding Skills		
There is a great deal of clarity in both the threats that exist and measures that can be taken to minimise or remove these threats. You have identified potential threats and discussed ways to minimise them and how these threats relate to the scenario.	15	15
3. Cognitive and Intellectual Skills		
You have identified and exposed the main weaknesses in Batman Textiles network and discussed attacks that may occur as a result of these weaknesses. You have provided a range of appropriate solutions to mitigate these attacks including encryption and the creation of different networks within the business.	20	17
4. Practical Application Skills		
You have provided evidence of completing the packet tracer exercise and also provided evidence of creating a physical and logical topology diagram. Your diagram provides evidence that the wireless devices are on a separate network and a different ip address range than the desktop pcs, using DHCP from the router., you have configured the wifi with encryption and protected the communication with the router using SSH. You have identified the significance of each of the decisions that you have made to configure the network and protect the network.	40	37
5. Transferable Skills for Life and Professional Practice		
The report is presented to a professional standard. You have clearly identified the weaknesses with the current infrastructure and lack of appropriate policies and clear guidance on how to secure the network whilst maintaining functionality. Very good use of a contents page and appendices with appropriate reference throughout in the main report. An area that you could focus on was some extra detail that failed to add to the quality of the report and led to you going above the permitted word count.	10	7

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		89
	Up to four weeks late
