

MARKING CRITERIA and STUDENT FEEDBACK

This section details the assessment criteria. The *extent* to which these are demonstrated by you determines your mark. The marks available for each criterion are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
From a practical point of view - generally there is no problem except for the scripts which are somewhat simplistic - a little more substance/complexity would have helped. From a point of view re: CLI for both operating systems, you have a good spread of commands. A little more thought about scripts and making them useful for the end-user would have helped i.e. a help guide	100	58
1. Engagement with Literature Skills		
Although there has been some active research on the functions of the operating system, you need to be more mindful of information that was needed for this part of the coursework	20	8
2. Knowledge and Understanding Skills		
Generally, you CLI work is fine and demonstrate you can use them effectively. Scripting is a little problematic as your work on Linux scripts needs some substance/complexity and windows scripts need considerable work	20	15
3. Cognitive and Intellectual Skills		
A brief, but informative discussion from the functions of a typical OS. Although researched, you did have 500 words to play with and yet you did not put enough detail on you description - missed opportunity or not reading the rubric carefully enough ?	10	6
4. Practical Application Skills		
On the whole, the CLI elements of this coursework are mostly fine, but I would have started each command with the help for that command and described what was being planned. Linux scripts need a little more complexity and help for the user, but what was provided is minimal. Also, the rubric does hint at engagement with an online course - no evidence can be found	40	22
5. Transferable Skills for Life and Professional Practice		
Generally, structure/presentation of this report is fine, but you need to embrace the importance on referencing and how to cite correctly - this is very important for year 2 study	20	7

Assignment Mark (Assessment marks are subject to ratification at the Exam Board. These comments and marks are to give feedback on module work and are for guidance only until they are confirmed.)	Late Submission Penalties (tick if appropriate)		58
