1) Units for the following:

Area = M^2 Volume = M^3 Mass = kg Force = N Weight = N

2)

$$\text{Density} = \frac{\text{Mass}}{\text{Volume}}$$

$$\rho = \frac{\text{Mass}}{\text{Volume}}$$

3)

Resultant = 11.18 N to the Right 26.7° Above Horizontal
-a1

Magnitude =

Direction =

Specify the bearing =

Nick Davey

3b) $\tan \theta = \frac{12}{6} = 63.43 = \text{angle below Horizontal}$

$180 + (90 - 63.43) = 206.57$

Bearing = 206.57

$6^2 \times 12^2 = F^2 = 13.42 \text{ N}$

Resultant is 13.42 N to the left and 63.43 below the Horizontal

The Bearing = 206.57

4)

FH = 10,000 cos 25

FH = 9063.08

$9063.08 \times 2 = 18126.16$

= 18126.16

5)
b) c) d) e) f) g)
