

DIGITAL SAFETY

WHAT IS DIGITAL SAFETY?

Digital safety is an on line privacy and security while working using internet services.

ON LINE THREATS

There are different types of online threats such as:
Virus
Trojans
Spyware
Malware
Worms

STATISTICS OF HACKING

Online hacking is an unauthorised access to personal information. According to a report there are 2,200 hacking incidents reported daily. So overall 800,000 in an year.

HOW TO PREVENT ONLINE THREATS

- Antivirus
- Strong Password
- Update Software
- Check the risks of the website
- Do not open e-mail attachment from unknown address
- Be careful about phishing and Free Wifi

DIGITAL SAFETY FOR CHILDREN

Children can be the victims of online predators. Make sure to set up parental control for children's accounts.

CONCLUSION

Only digital safety awareness can reduce the online threats. It is essential to have some basic IT literacy skills about online threats and prevention.
