

DIGITAL SAFETY

MANOILA DANIEL

WHAT IS DIGITAL SAFETY?

Digital safety is a number of precautions taken to protect data and devices from threats while using internet services.

THREATS

- malware
- phishing
- hacking
- identity theft
- spyware
- worms

MEASURES TO PREVENT THREATS

- use a strong password
- keep software updated
- backup data regularly
- secure wi-fi networks
- use anti-virus

STATISTICS OF HACKING

According to tech report there are 2.220 hacking incidents are reported daily. So overall 800.000 in a year.

DIGITAL SAFETY FOR CHILDREN

Children can easily be victims of online Predators. As a protection make sure to set up parental control for children accounts.
