Digital Evidences Report

Task 1: Lab Setup

I created 3 virtual machines, one with ubuntu, one with windows server 2022 and another with windows client (windows 10).

Task 2: Ensuring Integrity

Unfortunately, due to local system difficulties (crashes, blue screen , and slow / old PC), a part of the virtual machine has been lost before testing recording the write disk test. It was however a success, by trying to copy a txt file from a USB key to the virtual machine.
