

We are officially launching our collaboration with Tracklib with Firebeatz as the first ambassador from the Spinnin' roster. Tracklib is known for their wide catalog of unique, original music. Ranging from Isaac Hayes to Mozart, you can be using (parts of) these tracks to create your own masterpiece. Just imagine being able to use actual parts of actual songs in your own track, from a 70s soul acapella vocal to a 90s guitar rif. Now you can!

For this contest Firebeatz have selected their 10 favorite tracks from the Tracklib library for you to choose from. We want you to show us what you've got! Go to www.tracklib.com/spinnin to claim your 30 days of free Tracklib subscription and on top of that get 15 tracks for free. Pick one of the 10 tracks Firebeatz selected and surprise us with your best take on that song! **Make sure you add the title of the Firebeatz song you have used in your production to the description while uploading. This is a requirement to have a shot at the prize package below!**

To make it even more special we have included some amazing prizes for the top 10 winners of the contest. The absolute winner of the contest wins a release on the Spinnin' Talent Pool Label, a year subscription to Tracklib worth 300 dollars and includes 35 free downloads per month, a meet & greet with Firebeatz, merchandise and more. For the 9 runner ups, Tracklib gives out a standard subscription worth 140 dollars and 15 free downloads per month. For all of your future hits. Do not miss out on this!

Curious what the 10 Firebeatz Favorites you can pick sound like? Check them below:
