Discover

This garden belongs to my parents. It is a place that I have watched my children grow up in. It is also a place that we as a family have spent summer evenings and family get togethers and even meeting long lost family from Australia in.

During the Covid-19 Pandemic it became a place where we could meet our loved ones in a safe environment and gave us, as a family, piece of mind that our parents were not only safe but had a focus and a purpose tending to their beautiful peaceful garden whilst we were all apart

Explore
Plants and
Flowers within
the area.

Wildlife within the area

Within the garden I spotted many different species of wildlife.

As my parent's house backs onto a wooded area, we had a suspicion that we may have been having another little visitor throughout the night. We put a little dish with cat food out and waited.....

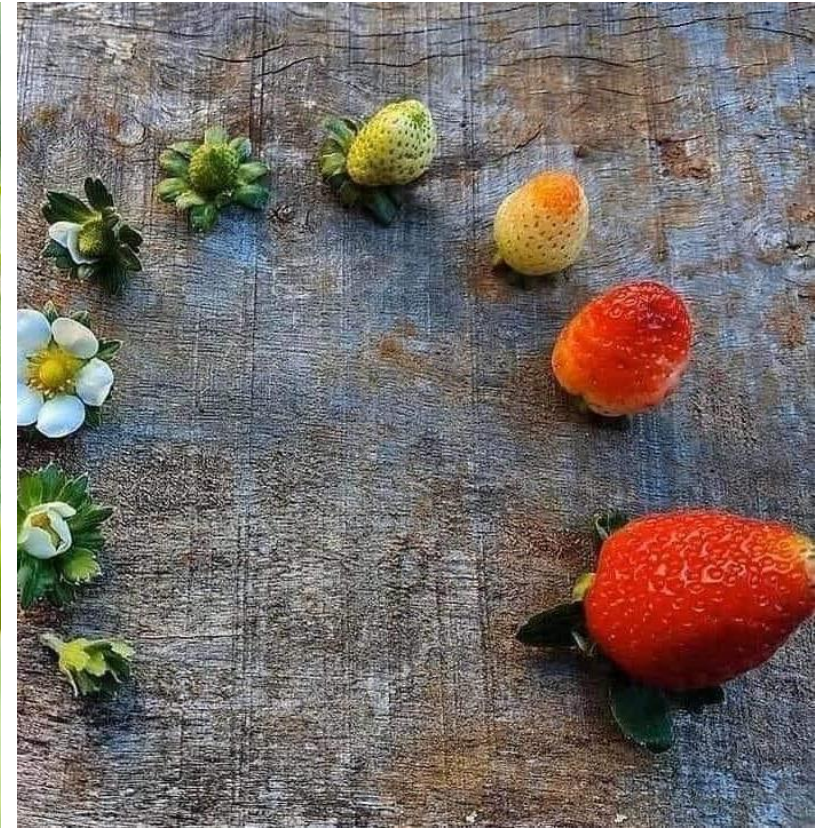

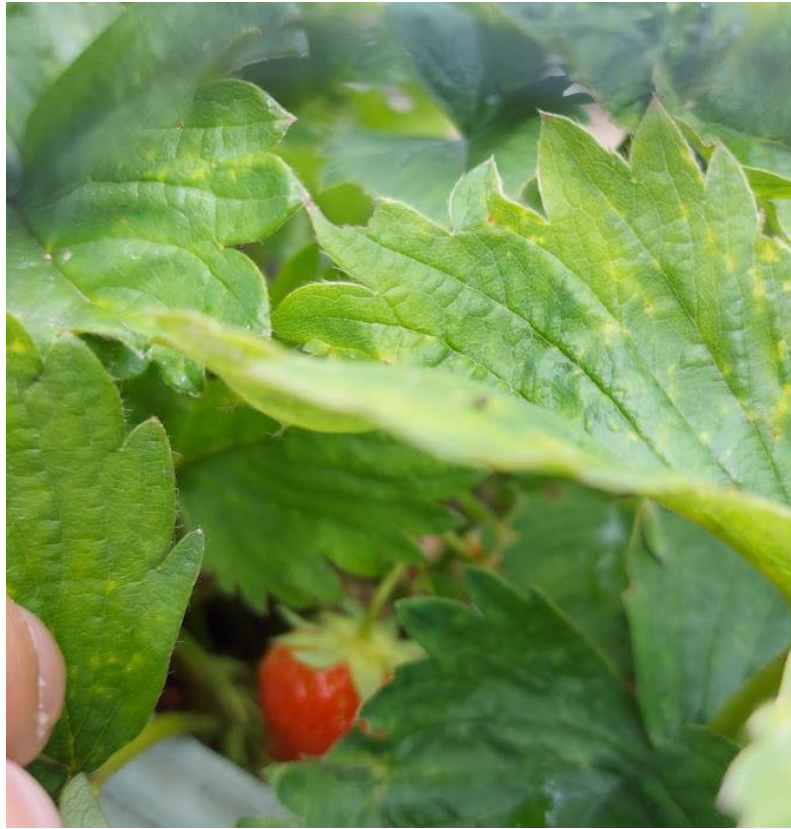

We were fortunate enough to catch a glimpse of these magnificent Hedgehogs!!

In a bid to keep encouraging these hedgehogs to visit the area , we ensured they had a safe place to hibernate or visit and left food out every evening

Conserve

In a bid to conserve the area we decided to plant strawberries within the garden.

-
- We also ensured there were bird feeders available in order to entice more birds into the garden.

So many species endangered or extinct,
Isn't it time we all stopped to have a think?
When will we realise we are fighting a war ,
Against climate change , poverty and rubbish on the floor,
What kind of world are we leaving for the children of
tomorrow,
Should it be a world filled with misery and sorrow?
Some may say I won't see it , its not my problem,
Surely it should not be up to our children or
grandchildren to solve them,
Why is this happening what can we do?
I'm hopeful that these animals won't need to be captive in
a zoo,
Let's all work together, act now don't hesitate,
We can ensure a future for our loved ones to be proud of
and celebrate!
