Common Assessment Criteria Applied	Marks Available	Marks Awarded
General Comments		
Overall a good assignment, but some points could be better such as the depth of your observations, the use of academic research papers and checking IP addresses carefully.	100	64
1. Engagement with Literature Skills		
You have researched the topics, listing many sources of information in your bibliography which you have referenced in your document. However more referencing of academic papers would have broadened your research	20	12
2. Knowledge and Understanding Skills		
You have researched the topics but your answers lack the depth of the observations asked for. Not all questions have been answered like security testing or IP addressing conflicts. Also more depth on your understanding of hypervisors and your choice would have explained your reasoning more.	12	7
3. Cognitive and Intellectual Skills		
You have stated your choice of hypervisor but, have not explained in depth the reasons behind your choice or why you rejected the other options.	15	5
4. Practical Application Skills		
You have set up the requested network of 4 machines. Each has been given a name and an IP address. Connection has been confirmed with the PING command. You have also stated what you did for each screenshot and these have the correct data stamp. However in workstation 2 you have incorrectly set the DNS server address you have also not shown the assigning or naming of the network cards.	40	32
5. Transferable Skills for Life and Professional Practice		
You have produced a clear document with all the requested sections. This is clearly laid out and makes use of a clear spelling and grammar. Your presentation also shows these points.	10	8
