

MODULE REVIEW MODULE TUTOR - REPORT FORM

The review of a module is carried out initially by the Module Tutor. When the module review is completed, its findings are considered by the Head of School or Programme Director and noted at the School's Annual Programme Review. Module feedback and what changes will be made as a result of the feedback given are also discussed at Staff Student Consultative meetings. This form is not compulsory but is provided to support the module review process.

Academic Session: 2021 - 2022
Module Title: Data Warehousing and Data Mining
Module Code: ACCA6026

<u>Student Feedback</u> Number of students registered and eligible to complete the questionnaire: 7 Number of returns: 6 Legitimate issues/ positive comments raised by a significant number of students (Please note number of students). - Many students found the data warehouse assignment challenging and enjoyable. Are there any sections or questions where the majority of students indicate that they 'mostly or definitely disagree' or where the results are well below the scores for other sections? - Students founds the semesterised modules intense, didn't seem to have time to reflect on studies. One student did not enjoy the unit and registered negative feedback in almost all categories on all modules.	
<u>Module Tutor's response to feedback given by students</u> - Students seem to enjoy the assignments. - Not sure semesterisation worked that well, although the allocated lesson time was adjusted too accommodated semesterisation, students commented on feeling rushed.	
<u>Tutor Self-Reflection</u> In what way might the module be improved in terms of content, delivery and assessment as a result of the feedback given? What (if any) changes will be made? On paper, semesterisation seemed a good idea with many benefits for both students and staff, however, it wasn't popular with the students here at NPTC. I will discuss it with the other cohort leaders at our review sessions and see if they had similar issues.
