

Set Design :

What the Inside of David's Brain looks like.

Task :

Create the inside of the protagonist, David's brain.

Budget :

£300 - £400

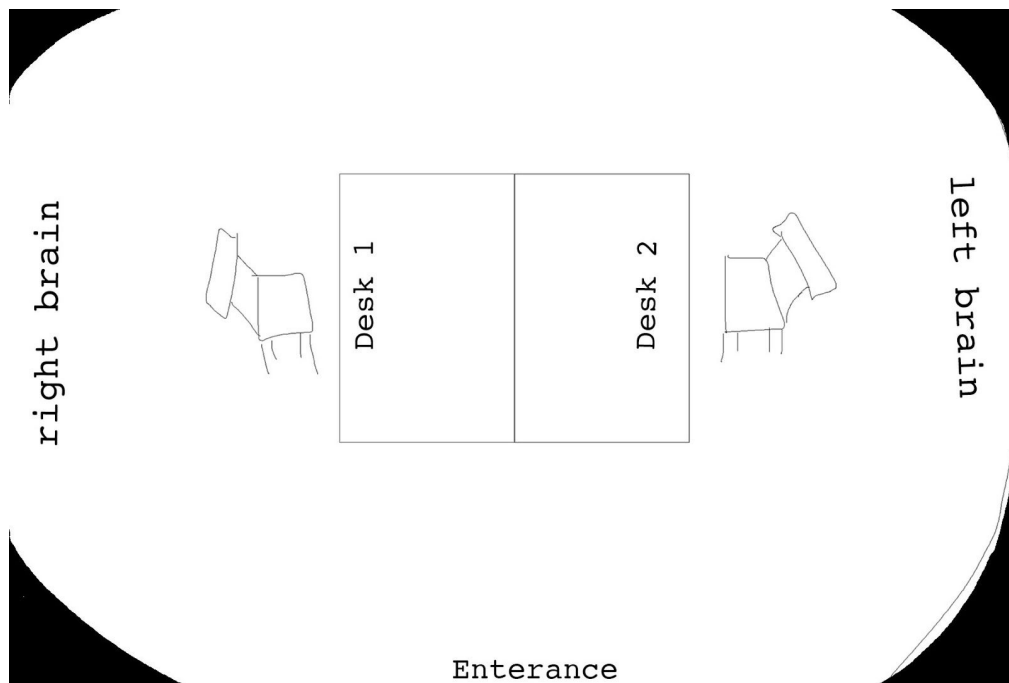

The Concept :

Left Brain - Right Brain is based off of the concept that the left side of the human brain is logical, reasoned, excels at math & science while the right side brain is creative, emotional, and loves art & music.

Taking this concept and bringing it to life with film means turning the Left Side & Right Side of the protagonist's brain into character's within the film.

Similar Concept :

'Everything You Wanted to Know About Sex' (Woody Allen, 1972) : [watch](#)

Creating the Brain :

My initial thought was to make a dome-like structure to replicate the inside of a brain which then we could build onto the dome using material either inside or outside of the dome. This is the dome that I find which may work but also might be too small to film inside. If you could come up with a creative way to either create a bigger dome-like structure that would be big enough to film inside.

This is the dome that might work but also might be too small. If we can't come up with anything else then we will probably just purchase this dome, build it and then create the brain using the structure as the 'skeleton'. - [Dome](#) (The dimensions are 5m Wide 2.5m High)

The Tunnel :

The film starts out showing David's everyday routine. After the morning routine montage ends and David is in work, the camera will move towards David's forehead, fade to black and then transition into David's brain. We will create this effect by adding a tunnel onto the entrance to the dome so the end shape of the brain will probably look something like an igloo. The tunnel will make the transition into the brain a lot more smooth.

Props :

Red Phone - The red phone acts as a mouthpiece for the left and right brain. (Already Purchased)

Periscope - The periscope acts as the eyes for left and right brain and when one of the characters look into it, it will cut to a Point of View shot of David. Will either need to be purchased. An example of how this is used is from the example from 'Everything you Wanted to Know about Sex' at [1:30](#) in the video.

Call Centre Script - Just a basic binder and maybe print off real call centre scripts to place inside.

Gameboy - Right brain uses this a few times. (Already have)

Location :

Tapestry - Llys Glas Old Police Station, Orchard St, Swansea SA1 5AJ

We will have the space for the whole of Easter Break. Which starts March 30th.

Filming Dates :

9th & 10th of April

Possible added touches :

Replicating veins in the brain - [Lights](#) or Wire

I would love to see what you guys can come up with to create this set. I'm very excited to see the outcome.
