

How to create a *HYPERLINK*

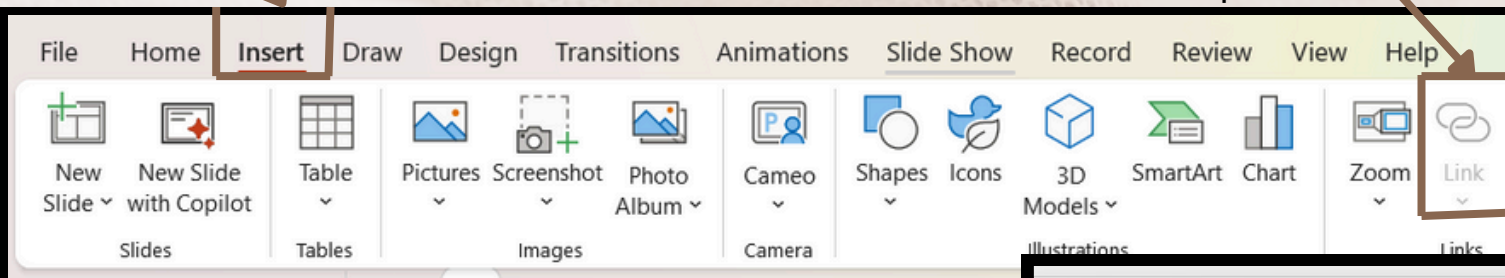

University of Wales Trinity Saint
David
Rejwan Bin Sulaiman
2430458
Mariia Dyts

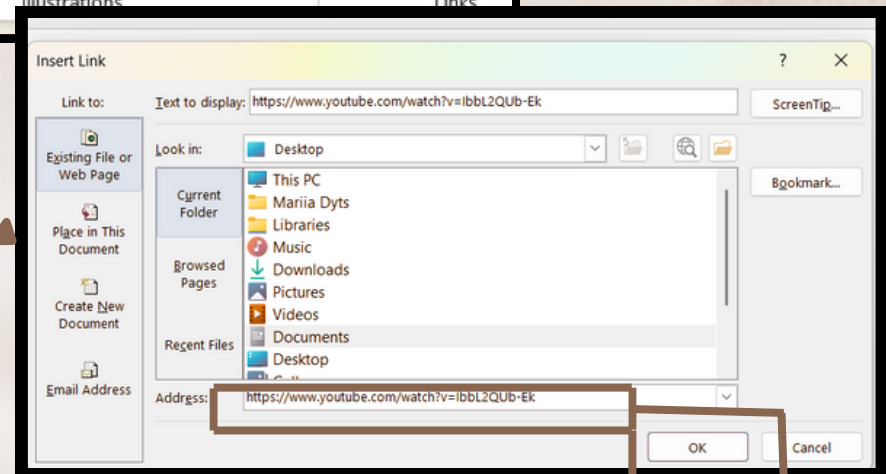

We need to open PowerPoint and select INSERT by clicking on it.

The next thing we do is select any word from the text (the one we need for this case). Click on the LINK option.

We need to open any page and copy the link.

When we see this option open, we have to paste the copied address into the window where it says address. After that, click OK. This means that everything is done.

In the end the result should be like this → HYPERLINK
