CREDITS: 20
JACS CODE: L100

AIM(S)

- To enable students to analyse the internal and external economic forces acting on management decision making.

LEARNING OUTCOMES

Upon the successful completion of this module, the student should be able to:

- critically evaluate economic data as a guide to policy making, within an international, national and organisational context;
- apply a number of different economic concepts (supply and demand, price elasticity, cost analysis) with respect to managerial decision-making in organisations;
- analyse the impact of government policy on markets, and its effect on managerial decisions.

INDICATIVE CONTENT

- An analysis of market supply, demand, price formation, and elasticities; the application of such theory to managerial decision-making.
- An analysis of business costs, in both short run and long run, and their part in decisions on resource allocation.
- An assessment of the impact on the economy, and the economics of developing policy, on sustainability, enterprise, social responsibility, and global trends in management decision-making.

- A critical evaluation of the main market structures (perfect market, monopoly, imperfect market and oligopoly), competition and cooperation models, and an analysis of the significance of each in resource allocation.
- An analysis of government influence on markets, and its effect on managerial decisions and the international business environment.
- The role of the state versus the role of markets: public services and privatisation; externalities and environmental costs; the impact of government policy; relevant legal framework, including - competition, mergers, consumer protection, and employment policies.
