Timings:

Monday-Friday: 9:00 to 18:00

Saturday: 10:00 to 14:00

Sunday: Closed

- ▶ I choose PowerPoint to create the poster because I was more comfortable using it to create and experiment with the various tools there to make the page clear, attractive and presentable. From the feedback from Nishi, I chose PowerPoint instead of Excel or Word, because the manager wanted a poster and I felt that excel is more for making spreadsheets and it would limit my creativity. Word was an option I considered but I wanted edge to edge background, and these were more easily available in PowerPoint.
- ▶ The data used was provided by the Manager of Study Space. I used picture from stock images. The banner and star bust was used from Shapes on the insert ribbon bar
- ▶ I added the headline text, which was not given by the manager, also changed some wordings and placements of ideas but broadly kept the data provided the same
- ▶ The feedback from Nishi was it is a great initiative to use PPT and the features of PPT, may be the explanation of “why I chose the tool compared to word and excel should be slightly more detailed”
- ▶ I improved the presentation and readability by using different fonts, making them bold or italics, thus making it easier to read and separating the different parts of the data provided
