

Design & Development of a Digital Intervention: Exploring Digital Learning Tools

Digital Tool Name	Briskteaching (AI tool)
Purpose and key features	Brisks brings AI into the tools you already teach with. From planning lessons to feedback to student support. It covers the full teaching and learning cycle. # • Create content • Give feedback • Inspect writing • Change level • Student activities
Strengths	- Supports instruction by summarising texts, giving feedback - Easy to use - Safe (data protected) - Free basic plan - No.1 AI platform for teachers - Personalises for you, adjusts for student level - Can be used all ages - American programme - Suitable for 1st -12th grade (ages 5-18) - 30+ activity tools - 50+ languages
Limitations	- Free basic plan, premium and intelligence (custom pricing) - Needs strong internet connection - Need an account to use it - Only suitable up to age of 18
Accessibility	- Limitation is you need an account to use it - Differentiates for different reading levels and languages - More than 58 languages it translates
Inclusion and equality	- Adjusts reading levels or translates content to support learners - 50+ languages - Keeps data private to support learners safety - Accessible for all - Need an account and internet connection to access
Learner needs	- Ages 5-18 - Uses different languages - Changes text depending on reader level - Makes texts more engaging, turns them into activity ideas for learners that engage better in practical activities - Gives learners feedback on their work
Opportunities	- Opportunity to save a lot of time planning and giving feedback - Opportunity to make work more accessible to people on different skill levels

	- Opportunity to create a multilingual accessible classroom
Risks and safeguarding	- Common sense privacy rating- good data protection, doesn't sell or share personal data ever - GDPR - Encrypts data - Never saves information
Pedagogical application	- Helps to plan lessons and meet learning outcomes - Gives ideas of ways to make lesson more engaging - Applies different learner levels to promote engagement for all students - Changes languages for inclusivity
How to set it up	- Choose what payment plan (basic, premium, intelligence). - Create an account - Put in your text or plan (pick any document used for teaching) - Ask 'brisk teaching' to do whatever you want to it (plan a 2 hour lesson around this topic) for example - Plans this for you to use when teaching - For students they can enter their text into brisk teaching and ask for feedback and improvements (what would you mark this essay)
Overall evaluation	- Very good platform to use, easily accessible however - American based programme - Not suitable over 18 - Not great for us to use but can see how it is a good platform for American teachers and students - Not sure of the price plan as it says custom pricing enquire
