

Formative assessment: Self-assessment of Poster Presentations

1. Is it clear which audience the Poster Presentation aims to target?
2. How can you tell this?
3. Does the Poster include the required elements indicated in the assignment brief i.e. title of the proposed research; prevalence description; rationale for the research; research question/aims and objectives; research impact description; reference list.
4. Is there a research proposal title, including student name, university programme, supervisor name and student's email contact?
5. Does the Poster has clearly written objectives, rationale, prevalence and research impact?
6. Is the prevalence description supported by statistics and credible academic sources?
7. Does the proposed title, research question, aim and objectives reflect your research topic?
8. Does the Poster follow a good structure (detailed, concise and clear)?
9. Does the Poster use appropriate format (font size, character)?
10. Does the Poster make correct use of captions/sub-headings.
11. Does the Poster contain bullet points with single/fewer or crowded sentences?
12. Do the images, tables, figures support the respective Poster sections?
13. Is the poster visually appealing, use of colours, headings, etc?
14. Is the reference list included in the Poster that accurately follows Harvard referencing format style?
15. Can you find and open the uploaded Panopto (draft) recording?
16. Can you see yourself?
17. Are the audio and recording clear and audible?
18. Can you see your shared PowerPoint slide/poster is readable?
19. Has the (draft) recording uploaded successfully?
