Student	LIU LINLING		
Dataset	MOTOR VEHICLE CRASHES.		
Marking			
Presentation/Slides (Clarity, readability, flow, accuracy, completeness, performance) Good clear slides and confident presentation. Speak up a little. :)			(10 marks) 7
Dataset Description (Where did the data come from? What does the data describe? Is the sample large enough? What data formats and types are involved?) Good presentation of summary data first. Good coverage of individual items. An example screenshot would be useful..			(50 marks) 32
Dataset Suitability (What features of the dataset lend themselves to data mining? Has it been mined previously? Why does the student feel that they have the contextual background to work with this data?) Good large dataset.			(20 marks) 14
Objectives (What does the student plan to investigate/expect to find? Are these SMART?) Good clear objectives Be careful with the number of old cars			(20 marks) 13
General comments Clear presentation.

Dataset Description (Where did the data come from? What does the data describe? Is the sample large enough? What data formats and types are involved?)

Dataset size is large enough
good description of data Attributes but screenshot of
dataset would have been nice

research questions

1- Prior to crash knowledge? how will you know this?
- question answered - use of Dataset Attribute.

2- older vehicles will always outnumber new vehicles

3- environment - you may need to think what is will be.
