GENERAL COMMENTS

Instructor

A good display of effort and promising work here Megan. Well done.

I'd suggest attempting the first perspective piece again but paying close attention to guide lines etc. as it can be easy to stray from perspective when drawing at an above angle.

Anatomy work shows promise, I would liked to have seen more finished facial drawings. The full body drawing again shows great promise, my advice would be to - like the perspective drawings, use the proportion guides as perhaps an overlay when you draw anatomy.

3D work shown is interesting and shows a good awareness of scaling. I like the way its set to appear like a diorama. Considering this is your first semester and first introduction to 3D art, this is impressive. Well done.
