MY CAREER CHOICE

PFSO-PORT FACILITIES SECURITY OFFICER

1.

Immingham Docks, Lincolnshire, UK

- The Port facility Officer must ensure that the port and all visitors are protected from threats that may come from sea and land.
- The officer must understand and implement the International Ship and Port Security (ISPS) Code.
- Every port must have a Port Facility Security Plan, a restricted document that is specific to that area.

2.

The Port facility Officer must be able to:

- assess the risks, threats and vulnerability of the area, staff or visitors.
- to develop, maintain and supervise the implementation of Port Facility Plan.
- understand the interface between ports and ships.
- audit security documentation and records.
- access control, screening measures.

3.

This job will also require to:

- test, maintain and calibrate of security equipment.
- to encourage security awareness and vigilance.
- identification of weapons and improvised explosive devices.
- conduct security training and drills.

4.

- I have 12 years experience in this position.
- In the last 4 years I was the Head of Security Department.
- I have all the skills required to apply for this position but I will require more training regarding the identification of weapons, explosive devices and drugs.

5.

- This job is coming with a massive risk of contraband, stowaways, theft, terrorist activities.
- The drills and exercises I have organized in my previous job, were meant to improve the psychological capacity in preventing and defusing dangerous situations.

6.
