1. Research-informed Literature				
Introduction	/5	/5	4/5	/5
Literature Review	/20	/35	19/20	/15

Comments:

The introduction highly written but abstract need improvements.

Excellent account of background knowledge and related work. of high standard. well discussed. The plus about your work is that you do not only give definition you discuss the terms & terminologies.

3. Analysis				
Results & Discussions	/25	/25	22/25	/25
Conclusions and Recommendations	/10	/10	7.5/10	/10

Comments:

Overall, the results are evaluated, discussed and analysed at a high standard.
However some figures could be annotated. It would be good to see what the outcome would be if the practical experiment runs for a much longer period.

The conclusion was done well with recommendation.
It would be good to state key findings & state key factors for the conclusion drawn

5. Skills for Professional Practice				
Reflection	/10	/10	10 /10	/10
Quality of Report	/10	/10	9 /10	/10
Comments: This is the type of reflection needed; It gives an overview of what the project taught the author, lesson learnt, things that could be done differently, barriers experienced, positives & guidance to future students. Plus a summary. Can't justify taking away any marks. The project was of high standard, flow & organised exceptionally well. Proper referencing utilising mostly peer reviewed articles. A few spelling errors & contraction grammar errors.
