

SSE Renewables — Five-Year Financial Performance Table

Financial years ended 31 March 2022 to 31 March 2026 | Profit and investment figures in £ million

Scope and data limitation

This version uses SSE Renewables segment data, not the SSE plc consolidated group. SSE's annual reports disclose segment-level adjusted and reported operating profit and investment/capital expenditure, but do not provide a complete standalone income statement for SSE Renewables with its own revenue, cost of sales, finance costs, tax and net profit for each year. Those undisclosed lines are not estimated or substituted with group figures.

Single comparison table

Financial year	Adjusted operating profit (£m)	Reported operating profit (£m)	Adjusted investment & capital expenditure (£m)	Notes
2021/22	568.1	427.8	811.0	Segment figures reported in SSE FY2022/23 results; 2021/22 comparative.
2022/23	580.0	446.3	837.5	2022/23 figures; segment reporting includes solar and battery after restatement.
2023/24	833.1	630.3	1,097.1	Adjusted operating profit rose 48% year on year.
2024/25	1,038.8	617.6	1,001.8	Adjusted operating profit rose 25% year on year.
2025/26	1,076.4	725.3	739.0	Adjusted operating profit rose 4% year on year.

Brief analysis

Adjusted operating profit increased from £568.1m in 2021/22 to £1,076.4m in 2025/26, with a small rise in 2022/23 followed by stronger growth in 2023/24 and 2024/25. Reported operating profit is lower than adjusted operating profit in each of these years, reflecting items excluded from the adjusted measure; the distinction matters when assessing underlying performance. Adjusted investment and capital expenditure peaked at £1,097.1m in 2023/24 in this series and then fell to £739.0m in 2025/26. Changes in annual investment can reflect project timing and construction stages, and should not automatically be read as a deterioration in performance.
