

Digital Safety

Make sure your internet is secure:

Use strong password.

Keep everything updated.

Use vpn.

Use multiple fire walls.

Rename routers and networks.

Turn off the WPS settings.

Online Digital Safety Tips SMART

- STAY SAFE ONLINE
- DO NOT MEET UP ANYONE
- DO NOT ACCEPT MESSAGES AND FRIEND REQUESTS
- NOT EVERYTHING ONLINE IS RELIABLE
- TELL AN ADULT YOU TRUST IF ANYTHING HAPPENS ONLINE THAT YOU DON'T LIKE

ONLINE SECURITY TIPS:

BE careful of the WI-FI networks that you connect to.

Not all open WI-FI networks are safe. Hackers on these networks can easily access sensitive information from your device.

A free network does not guarantee a safe network.

Introduction

Online safety is being aware of the nature of the possible threats that you could encounter whilst engaging in activity through the internet.
