Introduction

The use of PowerPoint and OneDrive to enhance efficiency in the Sunrise residential care home.

Introduction

This Photo by Unknown Author is licensed under [CC BY-NC-ND](#)

- Sunrise residential care home is a small sized facility delivering long-term caring for elderly adults. Many of the Residents who have Dementia and mental health, who also are bed bounded this care home has around 35 residents which is a small care home. This care home has three Nurses, twenty care worker that provide person scented care. They also provide personal care too those who are bed bounded such as bathing, feeding changing. Sunrise has begun to use, digital skills such as, care-specific, software (e.g., digital care records, and data protection and cybersecurity via digital devices specifically for care home.

Care Home benefits and limitation.

Sunrise provides benefits like profession 24/7 care safety nutrition's meals, and social opportunities but have limitations including high cost, loss of independence and limited privacy .

Benefit.

Professional and constant care
Safety and security.
Clean comfortable environment
Peace of mind for families

Limitations

Care homes provide financial assistant from local authority.
Difficult transition moving into a care home can be difficult it may take time to adapt to the new environment and routines.
Emotional impact the more can be emotional challenging for residents and their families.

Facilities in sunrise care home?

- Private rooms, Residents in care homes have their own bedrooms, often with en-suite bathroom.
- Communal Area, lounges and dinning rooms are provided for social interaction and meals.
- Outdoor space , such as garden-fresh air for residents to enjoy outdoor activities.
- 24-hour care staff are always available for resident's care needs.
- Personal care help with daily task such as washing and dressing and toilet needs provided.

Digital communication in sunrise care home.

This Photo by Unknown Author is licensed under [CC BY-ND](#)

IN CARE HOME STAFF MEMBERS USE SOCIAL MEDIA FOR THE RESIDENTS TO STAY CONNECTED SUCH AS VIDEO CALLS AND SKYPE WHATSAPP'S, EMAILS REGULAR VISITS FOR RESIDENTS TO STAY CONNECTED WITH FAMILY.

Digital skills in sunrise care home.

- Digital skills in care homes is essential for enhancing the quality of care, improving communication, and ensuring that staff are prepared to use technology effectively.
- skills, knowledge, and attitudes necessary for staff to effectively use technology in care settings. It is crucial for several **reasons**.

Digital safety in sunrise care home, covering secure login, email, safety documents confidential information.

Personal data should not be disclosed with anyone should be kept away and only shared with healthcare professional with consent otherwise the patient's private information should be kept personal for safety issues.

Personal data should be stored away on physical files or digital systems access should only be available to healthcare assistants.
Private information should not be discussed Infront of any of individual only staff members.

Skills and benefits?

- Empathy and compassion.
- Communication skills.
- Problem solving skills.
- Confidence.
- Organization skills.
- 24/7 care.
- Toilet managements skills.
- Feeding, dressing and undressing.

Technology and safety features used in sunrise care home.

- Call systems alarms are available in all rooms bathrooms for residents to call staff for help.
- Wi-Fi and communication internet access and video calling systems are given to residents to stay in contact with family and friends.
- Digital health records electronics systems are used for managing confidential information.

Conclusion?

My conclusion to the sunrise care home setting is that I can understand that the residents need 24-hour care at all time.

The resident's date is personal and confidential and is secured on logins and emails only share with health care professions.

Making sure the residents in sunrise care home have the best quality of care and giving all the support and access to lounge areas food internet facilities.

Care homes also provide information on digital skills to ensure care plans and medications rounds.

ONERALL OUTCOME.

- The research that I have done and found is from Wikipedia and is relevant is giving all the skills that are needed in care home setting such as private confidential information about residents' health care that needs to be kept private only disclosed to the health care members. Such as mental health dementia treatments medication given 24-hour support staff managing toilet needs dressing undressing.
