ABOUT ME

I'm very passionate in enabling people feel empowered to live a fulfilled life no matter their circumstances. I have over 7 years of experience in providing support and care, to those who require that extra little bit of help. I am currently broadening my knowledge in health and social care as a student, having committed myself into making propitious decisions both within my education and employability. At this present moment i'm in my second year of my degree and have so far passed all of my modules and assignments with high marks.

Once i complete my studies my main goal is to become my own boss, i will focus on entrepreneurship in aquirng a small business in micro providing and to help women and children escaping domestic violence. I now feel that i have become more confident and a sense of excitement exhumes me in helping those that have had such traumatic experiences by giving them the strength and oppurtunities to no longer feel as victim but a survivor.
