Start your coding journey today! Explore online resources and build your web development skills.

Based on research online done by multiple individuals the result is that the request off working online is getting higher day by day this includes some surveys like LinkedIn [1] . Also, in one article done by The University of Texas at Austin named “How to become a web developer and how long it will take? “ [2] it explains the steps you need to take and haw much it takes to become a web developer or go in the IT industry there is different institutes they help with different types off bursary and free curses also some online teaching is also free so you can learn online

The poster I have done invite young, People to take their life in their hands. Letting them know there is a possibility for everyone even if you quit on the early studies also give you a Hight light and some help to start your journey including some motivational start.

I also include some links in the reference, some guides and some links to begin with.
