- What is digital safety and how important is.
- Tips for keep us safe.

Here we can see the total average for all the people who is being hacked in different countries. Brazil is the most hacked country with a 15.6%. France is the least hacked with a 10.7%.

Digital safety is the act of remaining safe on all digital platforms. More commonly known as cyber safety, it encompasses all types of technological devices that have access to the internet from laptops to mobile devices. Is very important to keep us safe and everyone needs to know that. We have a few many tips to understand what is digital safety and how to do it.

A few many tips to keep us safe :

Use strong and unique passwords with different types of characters to make sure that we have big security.

We need to make sure that we are safe, we can't share our personal details, passwords, bank details , etc.

We can use an authenticator app to have our accounts safe for example:social media accounts.

Make sure you have a secure backup email and phone number.
