

DIGITAL BASIC SAFETY

Create complex passwords with a mix of letters, numbers, and special characters. Avoid using easily guessable information like birthdays or common words.

Enable Two-Factor Authentication. Add an extra layer of security by requiring a second form of verification in addition to your password.

Regularly update your operating system, applications, and antivirus software to protect against the latest threats.

Regularly back up important data to an external hard drive or cloud storage service.

Be mindful of the personal information you share online, especially on social media.

Use a lock screen password, PIN, or biometric authentication for your devices. Install antivirus software and run regular scans.

Regularly check your financial and online accounts for any unauthorized activity.
