

Whoever wants to defeat America will stop the war

An article by Chinese writer Chua Qinling March 24, 2023.

1. The biggest threat to the United States is not China, but peace.
2. World peace will end the American dollar empire built on war, war economy, and war trade.
3. When there is peace in the world, America will be lost.
4. They did not know what to do, because many of those who were employed only to instigate war and use their equipment would become unemployed.
5. The entire military-industrial complex will go out of business.
6. All US military bases in the world will be redundant, as will all aircraft carriers, military aircraft, intercontinental ballistic missiles, weapons of mass destruction, and all war support industries.
7. Employment will be the number one problem in the United States. When the American war machine is idled due to inadequacy, all CIA operatives will be out of work.
8. All fake news about threats and enemies will become a joke.
9. A military budget of nearly one trillion US dollars would be prohibitive if there were no wars and enemies.
10. When there is peace in the world, Americans must create jobs for themselves, make themselves useful again as responsible people, not warmongers and murderers, not war traders.
11. No one will buy expensive war machines, and there will be no need for military groups also known as allies.

Americans have criticized the recent peace agreement between Iran and Saudi Arabia brokered by China, describing it as a threat to American interests. America is ready to violate this peace treaty. This is how evil America is, ready for war or not, and opposed to peace.

Peace goes against the interests of America, an evil empire that thrives on war and instability and sells weapons to kill and destroy in war. America condemned China's proposal for a ceasefire in Ukraine and the start of peace talks, and America also said that there was no ceasefire. The world community has become aware of America's crimes. Everyone wants peace except America. Only the blind and stupid still support the evil, warmongering Americans, and their evil ways.
