

MSc Professional Research Skills 2019-20

Slides kindly adapted from Prof Research Skills Research Group 2016-17

- Strong focus throughout MSc on developing professional skills
- Entire module centred around working as a professional research team
- Team-based learning (TBL) is an active learning method developed to help students achieve course objectives while learning how to function in teams (Sisk, 2011)
- Studies suggest good student satisfaction, engagement and outcomes from TBL

Research Team =
Team-based learning approach

Working as a Team

Project PIs

An exploration of the psychological
predictors of engagement with
environmentally friendly behaviours

Project Focus 2019-20

Design:

2. Aims of the Research

- 2.1 The aims of the research therefore are to
- Assess whether there are differences in attitudes to the organ donation legislation and;
 - Understand levels of knowledge about the organ donation legislation in Wales (where appropriate).

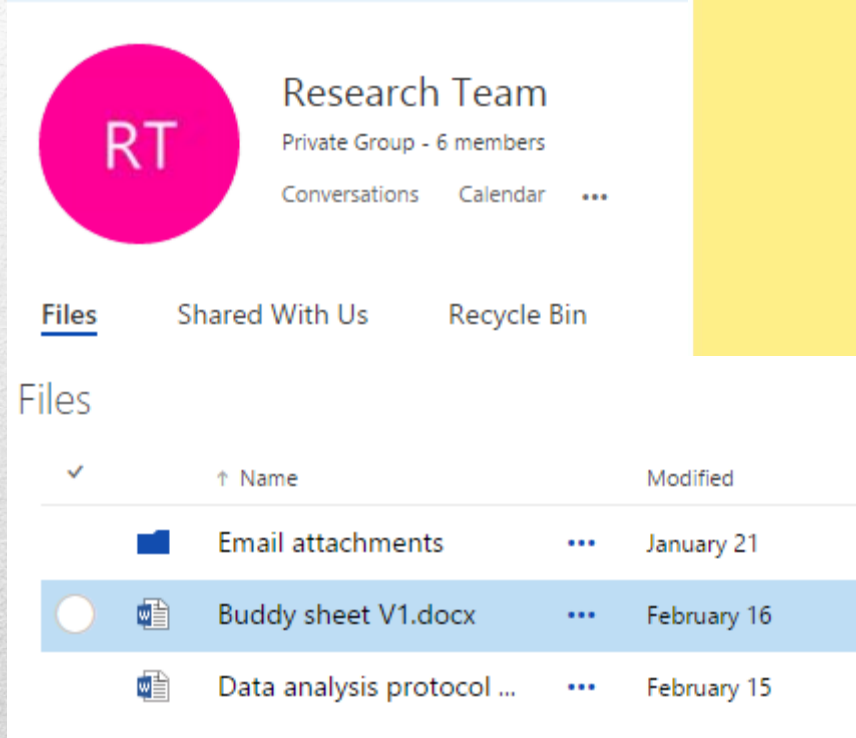

3. Methodology

3.1 The proposed methodology for this research project is left to the discretion of the applicant. It may be approached from the standpoint of one of the smaller-scale studies.

3.2 The methodology must ensure that it examines the psychological attitudes toward organ donation *in relation to the legislation brought about on 1st December 2015*. Whilst an understanding of attitudes towards organ donation in general is acceptable as part of this methodology, studies that focus upon organ donation but exclude issues of legislation changes will not be considered under this grant.
