

# How to Insert a Chart in Excel

## 1 Select Data Range

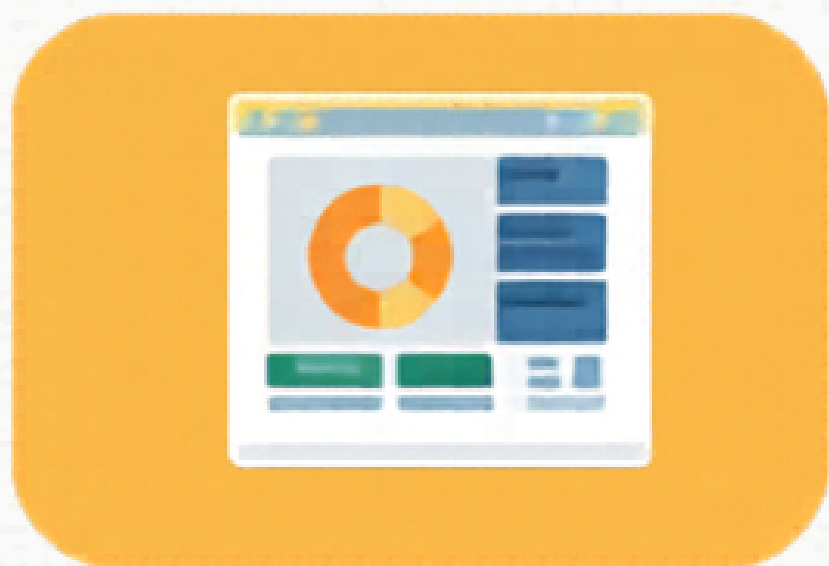

The data you want selected is your cell range. Highlight your data to make the chart areas.

## 2. Custom Chart Type Tab

Explore various chart types to choose the best one suitable for your data (e.g., bar, line, pie).

Your paragraph text

## 4. Custom Chart Type

Use color checks and icons to select the chart style. Pick from the available options that best showcase your data.

## 5. Place and Size Chart

Use handles to resize and position the chart properly on your worksheet.
