

How to insert hyperlinks in a PowerPoint

First you need to open PowerPoint and press insert, which is located next to the home button.

After you press links(3) then press link(4)^

After you press link, it will then be a folder that opens which shows as following.

You can then put a link from your folder (current folder) or you can place in a document by pressing the file on the left which says as follows.

You can also copy and paste a URL where it shows address, after you do that you can also choose a title to write and display what you want by writing in the Text to display. Press okay and you successfully inserted a hyperlink.
