

aptions can also go below the image. Make sure to use a large resolution photo. Web photos / ternet photos are usually really bad looking on a poster. Photo reproduced from [2].

Always make sure to reference the source of your photos or illustrations, unless you made them yourself. Then you don't need to cite an additional source. Isn't this a beautiful picture?

Forward Speed vs. Change in Liftoff Angle

Module :Introduction to Automotive Poster Template

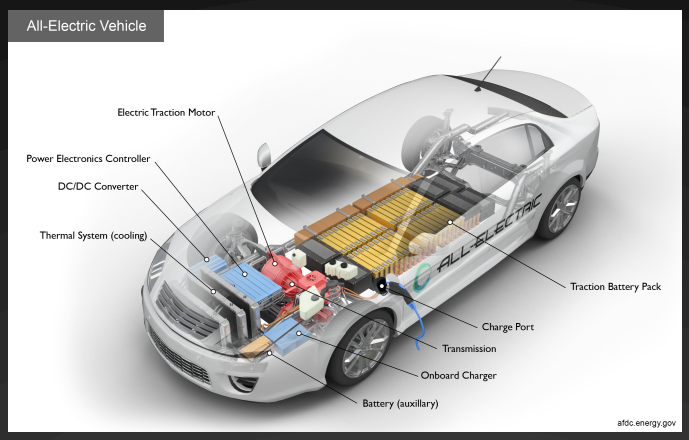

Module Code: ACHA4009

Student: Javon Delancy

Supervisor: Andrew Noble

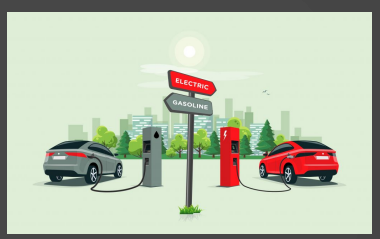

School: University of Wales Trinity Saint David

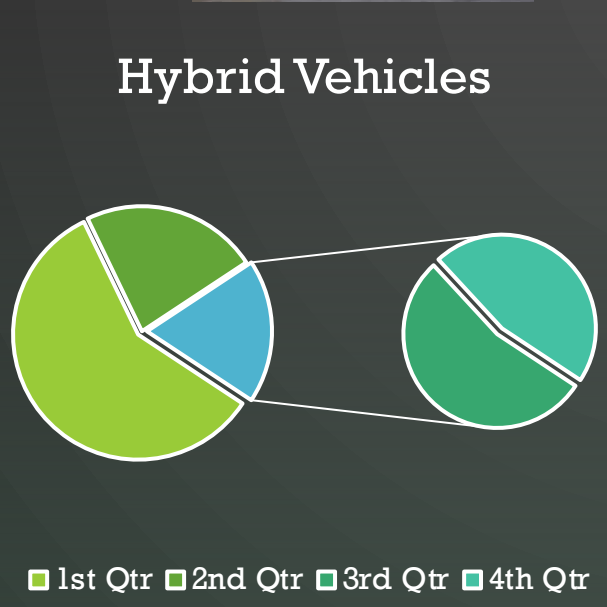

BEng Foundation Mechanical & Manufacturing Engineering

- **Vehicles are becoming more complex and require a higher level of knowledge and skills.**
- **Electrical and electronic components and sensors are included throughout the vehicle**
- **Construction of parts and materials being used has changed over the last few years, meaning.**

I extend thanks to the following sources and information given that was used for this assignment: for more information check out the references
