

Event Notification form Commentary

The event notification form is a very important document for any festival that takes place, as well as other industries. It is designed to support organisers to run events in safe manner, and ensuring that all of the necessary permissions/ licences are in place and 'that they comply with the relevant legislation and any permissions'. (Rutland County Council 2018)

As Lakewave festival is an event meant to be taking place in Rutland, I searched o the official Leicestershire & Rutland notification form. As it was mentioned on the previous commentaries in this project, Lakewave festival is still in its very beginning form, so thee is lots of existent information that remains unclear. But even though these remain that way, I was able to explain that due to the event's early stages, these details are yet to be discussed.

This form will be available of the council any other liaison that Lakewave festival is collaborating with, which they'll be able to check and approve. It will also go though several updates as the team will be receiving new information to incorporate to the event.
