COCKTAILS BAR

**Happy
hour**

in this poster there's a lot of colours going on to give people idea of what we are offering in our restaurant so they can have a go and try our foods and cocktails, This poster explains a lot of things because it's really colourful and vibrant to catch peoples eyes on it and the more colourful it is the more it's eye catching, colourful brings happiness and create good and positive atmosphere in everyone life's wether it's a restaurant or not it's a nice place to visit with family or friends to have fun to dine with because it has live music to enjoy and you can sing along while you are dining with us and you can have a little bit of taste of our worldwide cocktails to choose from, there's so many varieties and we do every cocktails you could think of, I have also added a picture with the food to make their mouth watery because everyone loves food and people can't resist from trying foods. This is my business plan, I have always wanted to open a restaurant and decorate it that way people could enjoy their meals while listening to live music and having cocktails of their choice in one place and we also do mix of cuisine such as Mexican, Brazilian, American and Indian to choose from so we can have lots of customers to try out our food from other customers reviews, also our cocktails is the best, we also offer happy hour and a kids a game room to play with other kids while you are enjoying your meal.
