

From "on-site scoring" to "separation of exams and grading", the influence of the reform of Chinese art examination on broadcasting and hosting major

The Aim

- Analyze the implementation effect of "separation of exams and grading"
- Discuss how technology can improve the fairness of art examination
- Assess the candidate's adaptability to the new test method
- Get feedback from relevant educational institutions

The Context

- **China Art Examination:** The Unified entrance examination for art majors of ordinary colleges and universities, referred to as the Art college Entrance examination and Art examination, is the entrance examination for art majors of ordinary colleges and universities of the People's Republic of China.
- **Broadcasting and Hosting major:** "Broadcasting and Hosting" is a relatively common major in Chinese universities, the main purpose of this major is to train radio and television announcers and hosts of different types of programs.

The Text

The examination form of broadcasting and hosting major has changed from "on-site grading" to "separation of exams and grading" system.

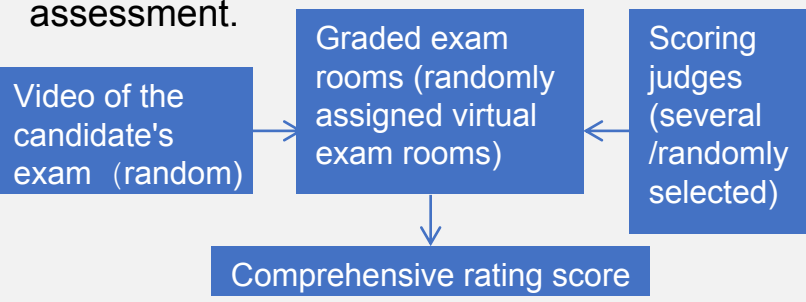

- **On-site scoring definition:** the test venue where the judges are located is relatively fixed, and the candidates are randomly assigned to different test venues. After the test is over, the judges score the candidates on-site, and the scores can not be changed.

- **Separation of exams and grading definition:** Candidates and examiners do not meet. "Candidates are first organized to record audio and video on the spot, and then judges are organized to score candidates' performance according to the recorded audio and video, and judges are not arranged on the test site "(Feng, 2024, para12).

- **Adopt three random system:** Candidates randomly assigned, judges randomly selected, random formation of the examination room. Different from the former fixed examination room fixed teacher, the "separation of exams and grading" system sets more randomness to improve the scientificity and fairness of the assessment.

The consequence

Impact Area	Key Points
Candidates	Reduce stress during exams reduce
	Fewer distractions during exams reduce
	Higher standards of professional skill
Educational Institutions	Exam format /evaluation criterion differences
	Training costs increase
	Re-equipment needs
Organizers	Teachers with On-camera experience
	Equipments and examers training
	Enrollment quality
Government	Reduce the likelihood of cheating on exams
	Increase public confidence
	Increased Transparency
Regional Disparity	There are policy gaps between different provinces
