LITERATURE REVIEW FOCUS

What is your literature review about ?

- Causes of early onset dementia

Research question

- What causes younger onset dementia ?

Aim

- My aim is this literature review is to find out why dementia starts at certain age
- What can cause early onset dementia
- What helps early onset dementia

Objectives

- The importance of early diagnosis of dementia
- The impact of dementia

METHODS

My literature review is based on secondary research

Keywords

- Dementia , early onset , family stress , clinical

Data sources

- Google scholar , Pubmed , google , uwtsd library

Inclusion

- People with 45 to 65 years old
- People diagnosed with a form of dementia
- People with Alzheimer's disease

Exclusion

- People Under 40
- Elderly people with different illness

FINDINGS AND KEY THEMES

key findings

- Diagnosis of EOD , young-onset dementia is relatively rare and professionals may not have much experience of associating the symptoms in a younger person (Mendes,2016).
- Symptoms of EOD , trouble with memory can be an early symptom of dementia (Sampson et al., 2004)

Key themes

- Psychological and social challenges faced by individuals with EOD (Haase, 2005)
- Treatment of EOD (Sampson et al., 2004).
