Globalisation and Climate change

(World Health Organization, 2022)

(MCKIBBEN, 2019)

“UNESCO (1997) identified that the global crisis facing humanity is a cultural crisis for it is culture that drives our whole systems of beliefs, values, attitudes, customs, institutions and social relations” (Welsh, HE Institutional ESDGC Group, 2010).

(Khaled, 2022)

“THIS ONGOING IRRESPONSIBLE BEHAVIOUR WILL NO DOUBT BE REMEMBERED IN HISTORY AS ONE OF THE GREATEST FAILURES OF HUMANKIND.”

(LATESTLY, 2022)

30 years on from the first summit and Human activity is threatening the environment.

Activist such as Greta Thornburg have passionately aired concerns and protested to the Nations on the urgency to take action on climate change.

Scientist predict that sea level will rise by 10cm-90 cm making some coastal areas uninhabitable over the next 100 years (BBC, 2019).

“The effects of human-caused global warming are happening now are irreversible on the timescale of people alive today and will worsen in the decades to come”

Poverty

Statistics

According to UNICEF

700 million adults live in poverty.

An estimated **365 million** children live in extreme poverty.

1 billion children across the globe are multidimensionally poor which means they do not have access to sanitation and education.

In Africa less than **35%** of the population have access to improved sanitation and less than **76%** have access to portable water (SHEHU,2019).

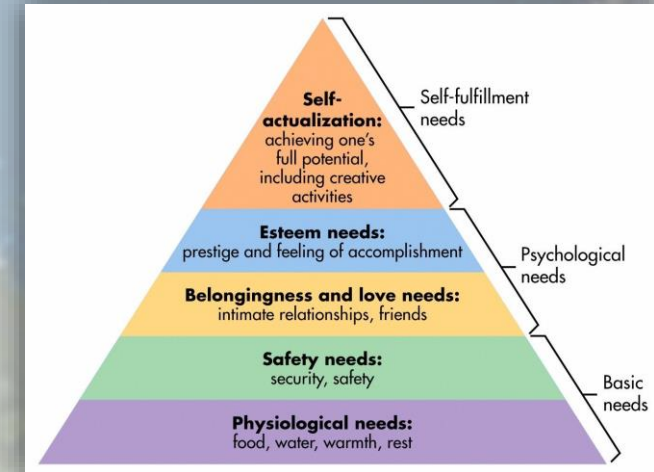

(SHEHU,2019)

(Miller, 2012,childpoverty at lowest rate for 17 years)

(UNICEF 2017)

(McLeod, 2007)

Children across the Globe are not having their Physiological needs met. The United Nation Convention on The Rights Of The Child **Article 27 states** "Every child has the right to a standard of living that is good enough to met their physical and social needs and support their developments. Governments must help families who cannot afford to provide this" (UNICEF,, 2017).

Global Perspective why is it important?

“Education for Sustainable Development (ESD) empowers learners of all ages with the knowledge, skills, values and attitudes to address the interconnected global challenges we are facing, including climate change, environmental degradation, loss of biodiversity, poverty and inequality” (UNESCO, 2021).

“Education builds common purposes and enables individuals and communities to flourish” (UNESCO,2021).

(Ezbakhe, 2018)

ESDGC was designed for learners to study a range of global issues

“Education for Sustainable Development and Global Citizenship (ESDGC) is education that will prepare young people for life in the 21st Century” (Welsh Assembly Government, 2008).

“To educate students with the global understanding necessary to address the challenges of our interdependent world” (Communications Coordinator, 2012).
