

Data Mining – Dataset Presentation			
Student	Xin Yu – 11:21		
Dataset	Used cars		
Marking			
Presentation/Slides (Clarity, readability, flow, accuracy, completeness, performance) Good clear slides without too much text. Good use of graphics. Good verbal presentation. Very good summary slide.			(10 marks) 7
Dataset Description (Where did the data come from? What does the data describe? Is the sample large enough? What data formats and types are involved?) Good source and clear link to it. Good clear list and explanation of the attributes. Good example data.			(50 marks) 35
Dataset Suitability (What features of the dataset lend themselves to data mining? Has it been mined previously? Why does the student feel that they have the contextual background to work with this data?) Plenty of data, and a good number of attributes. Good justification for the use of this data, and clear recognition of some of the potential hazards.			(20 marks) 14
Objectives (What does the student plan to investigate/expect to find? Are these SMART?) Good set of objectives, and clearly a wide range of things that you can explore.			(20 marks) 15
General comments Be careful when you present something to close the video window or it will appear as a large black block on top of your presentation.
