STUDENT FEEDBACK FORM

This section details the *extent* to which the assessment criteria are demonstrated by you, which in turn determines your mark. The marks available for each category of skill are shown. Lecturers will use the space provided to comment on the achievement of the task(s), including those areas in which you have performed well and areas that would benefit from development/improvement.

Generic Assessment Criteria	Marks available	Marks awarded
1. Engagement with Literature Skills		
You use three references – all from Archdaily – an on line journal – you need to use wider sources. However you do cross reference your sources.	20	8
2. Knowledge and Understanding Skills		
In such a short piece of writing you really need to attack the question head on. You have a long preamble which raises a series of issues – but you don't get to the question until the final page – where it is dealt with in a single paragraph. You need to select material that responds to the question and answer it directly.	15	7
3. Cognitive and Intellectual Skills		
In the preamble to your answer you refer to some interesting definitions of architecture and also describe some buildings. There is very little analyses and you don't connect this to any general theme. The essay is very fragmented and lacking in coherence.	20	8
4. Practical Application Skills		
When you are paraphrasing articles your writing is of a good standard. However, when it comes to the paragraph where you actually address the question your writing becomes disjointed and the meaning is not clear at times.	25	12
5. Transferable Skills for Life and Professional Practice		

The question 'why study architecture today' is not fully addressed. The structure of the essay is based around sections that act as a pre- amble to the question – unfortunately by the time you get to the question there is no space left to answer it.	20	8
